Water Pass, Calif

- Dear Dorn:

Received all the papers today and I want to thank you all at Kary, now I know that all of you are behind me 100% & this gives me a great relief & believe me I am working harder than ever not to let you down in no way. I think you know it gives me great pleasure to know that I have you to depend on & for all your good work you are doing for Legenday & me.

To you all in Utah the work is getting harder than ever & tougher, Paul Veillet & I are working late at sites. We have found many cracks in the face of the tunnels & this means that we are getting closer to the cavern. every time we blast the crack gets bigger & better, so we can't be far from our goal I am sending a sketch sketch of what I am doing so far in hopes that you understand it, as you see this sketch, you will see two tunnels, one is going straight up into Crystal & the other one will be to the cavern which were about to go into any day now. so please stay with me. The Lord is with us we're not alone.

So till next time.

as ever your pal

P. H. Hernandez.

if you will men who have over many years
it could happen any time
