

Real Adventures with *EXPLORATIONS Inc. of Nevada* at KOKOWEEF PEAK

February, 2002

QUESTS, QUESTIONS, ANSWERS & ACTION ! The River-of-Gold Gets a NEW Deep Drilling Plan

History's earlier quests at Kokoweef Peak were mostly "SHALLOW" physical projects like digging in caves, tunneling or probing with diamond drills intent on trying to "find Earl Dorr's (elusive) surface entry & passageway to a DEEP, underground river-of-gold." Any natural passageway would necessarily have been open, continuous & gradual to reach the deep, underground **DESTINATION** described by Earl Dorr. This goal has eluded **EVERYONE** to date, which brings up a very real question ...

Q1. Would Earl Dorr really want to give away HIS discoveries, for free, to just anyone? Hmmm ?

A1. Probably NOT !

This notion *only begins* to explain why all **SHALLOW** excavations at Kokoweef Peak haven't succeeded **SINCE 1934!**

*For the last 68 years many people TRIED to "get Earl's gold." But no one seemed able to trick him out of even one "free" passage. One needsto **OUT-THINK** him to get beyond his motivation to create **cave blockages OR information blockages**, which served to **KEEP HIS MOST IMPORTANT, DEEP & VALUABLE THINGS SECRET**. Yep! Earl Dorr was a "practical miner."*

As explained at last year's picnic, proof of our mapped "elec-

tronic caverns" and minerals requires DEEP-DRILLING. It's because **ALL of our mapped, HUGE features START at least 700 feet BELOW the surface** and some appear to end at a **DEEP**, permanent watertable 1,800-feet below the surface of the base-camp! Mother Nature has been hiding it for **too many thousands of years!**

Our "electronic caverns" are just waiting to be proven by deep-drilling. Now, though, last year's hope of having a "professional" driller help us find huge caverns has "worn a little thin." The "professional" contract-driller has left us with no-show & no-call performances *time after time. So!*

Q2. Do WE, the investors and volunteers of EXPLORATIONS Inc., have the will to prove OUR maps ARE showing massive caverns, minerals and water?

A2. For many reasons we say, "YES!" We're more fortunate than most early diggers because **WE'RE STILL IN BUSINESS!** Mostly this is due to faithful volunteers and investors! Now, after last year's NOT SO professional "service," we feel **BETTER OFF** with our **own drill rig**, our **own crew** and our **own camera**, using a longer cable, to inspect the **anticipated DEEP discoveries** below what we still believe to be mapped "electronic caves." To help us find out the facts of the

Larry Hahn is all smiles as Mr. Charles Hardin offers his grubstake for a stock certificate. Please help us purchase **OUR OWN DRILL RIG.**

matter, a drilling rig was financed, in a good deal, at \$15,000. We'll be "fine tuning" this drilling rig in Las Vegas during the cold month of February. **We expect to be drilling with it before the flowers start popping out in April.**

WE NEED YOUR HELP NOW TO COVER THIS NEW DEBT SO IF YOU CAN AFFORD \$25 or \$50 or \$100 IT *WILL* HELP US MEET OUR GOALS. THANK YOU!

We hope this "KEY" unlocks our DEEP end of the rainbow. We still believe in the legend and our DEEP MAPS so we'll be drilling soon to try and find the BEST PART about the legend, which is **THE GOOD ENDING!**

THE NEW APPROACH FOR OUR DEEP SUCCESS REQUIRES OUR OWN DRILL RIG.

SHE'S OUR "GOLDEN OLDIE!"

OUR ADVENTURES CONTINUE !

Other unsung projects have been going on as well. Daryl Wade's part-time crew has been hard at work digging out the red, clay-filled cavern. **THANK YOU!** Steve Ekmark, Charlie Hardin, Eddie & Alison, Gerry McKee, Fred Loftus, Charles Bouck, Chad Omaha, Pat McGouwin, Gerold Lugo's family, Mike Mackey and Larry Butler! Figuring by 8-hour days, for a total of 38 man-days, they moved an amazing **325 cubic YARDS of clay!** During the project, an odd *skunk odor* became obvious in the Decline Tunnel! Then, by exploring places seen in historic photos shared by **DON KIRBY**, Charlie and Daryl found a non-historic, dead skunk waaay UP above in Kokoweef Cave. WOW! That proved there is some sort of **HIDDEN air-link** between **Kokoweef Cave** and the **Decline Tunnel** 200-feet below!

Mr. Hewitt has surveyed a possible site for the mysterious, decade-old, "underground-landslide cavern."
UPDATE: The I-15 Rock Quarry project **IS** moving along well now in the County's permitting process.
Meanwhile, your "retired editor," is working on "*THE* book" about "Earl's legend." When finished, you'll read about Earl Dorr's "stream of dreams" ... but expect to wake up to new facts, photos and maps linked together like no one has seen 'em interpreted in any short, generic, "treasured" storylines. There's more to this legend than meets the eyes! We should find a good bit of it at Kokoweef, first, by **FUNDING our own "Golden Oldie" drill rig.** Please, **HELP SUPPORT a MOTIVATED CREW** and get them drilling **DOWN A.\$A.P.!**

IMPORTANT NOTICE !

We will **NOT** have the **FOOD** part of this year's MEETING to save it's \$2,000 expense PLUS one month's "cost" of lost time in assembly & disassembly. **HOWEVER**, the required **BUSINESS part** of our annual meeting **WILL** be at Kokoweef on **Sunday, JUNE 2nd** for helpful explanations, discussions and elections. Also, **PROXY** voting forms will be mailed out to every stockholder of record about one month before this annual meeting.

ANY QUESTIONS ? Please call
