

# A NEW "PEEK" AT KOKOWEEF PEAK

A newsletter for investors ACTIVE in finding the legendary River-of-Gold!

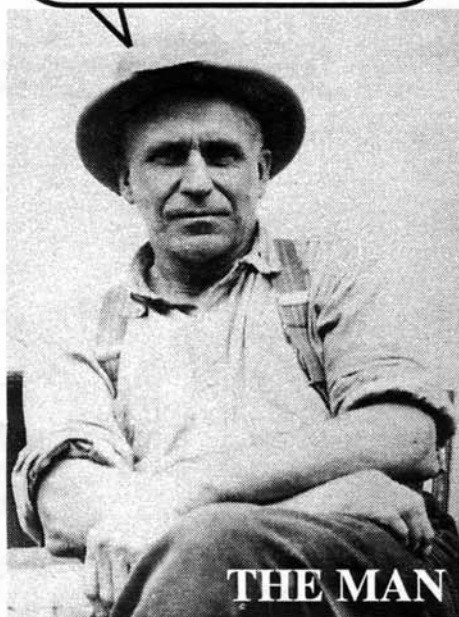

## DRILLING HAS US *HOT* ON EARL DORR'S TRAIL!

... AIR FLOW BREATHES NEW LIFE into Dorr's MAP & CONCEPTS

Don't let anyone kid you.

### ***There's GOLD in the caves!***

It's all underground; 2,000 feet below the limestone cap. It begins at the contact between the limestone and granite. It's in the fault walls of the canyon, on it's ledges of black sands, and in the river bottom. We measured it by triangulation and the river is 300 feet wide, 3,000 ft. lower than the limestone contact & close to sea-level.

**THE MAN**

**EARL DORR - 1935**

Photo courtesy of: Gordon Wallace  
President, Crystal Cave Mining Co.

Yes, the newsletter is late - partly because the editor was visiting a nephew of Earl Dorr who is ill. Meanwhile, drilling is racing along toward winter. This year 11,000 feet of drill probes were completed. If we were "Probing-by-tunneling," at \$10,000 per 100 feet of tunnel, our current information would have cost, a minimum of \$1,100,000.00...even with volunteers. And that would have taken over 10 YEARS to complete! ***Probe drilling IS the faster, safer and a least costly way to explore!***

Please take our **TWO** special requests to heart as the cost of the expanded drilling program is considerable and our budget is at **rock bottom**. Just as important as probing, we **NEED** to **VISUALLY INSPECT** all finished probe holes to map out complete information. A professionally-engineered video recording system is featured on the **back page**.

### THE MAP

# DRILL SITES ARE FINDING *DEEP FRACTURES* WITH AIR FLOWS

Walt Luet h, foreground, radios crew members 630 feet above at diamond drill site G-50.

**INVESTORS' SUPPORT** and Walt's mechanical skills, along with help from John Turnbull (background) and many others, enabled FAST assembly of the high-line cables, air, water and electric lines.

## G - 50 DRILL SITE

500 pounds

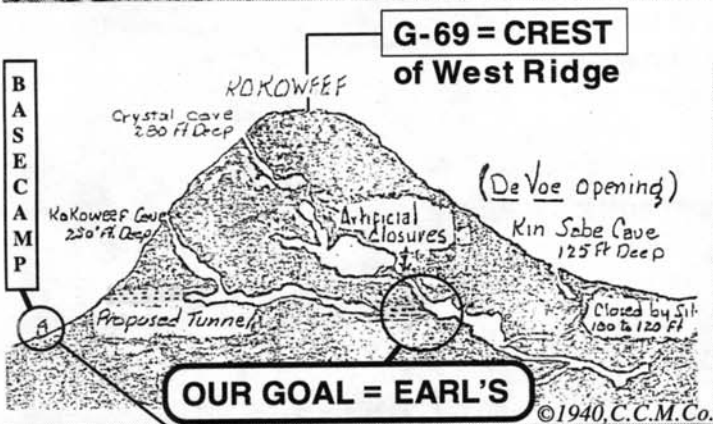

**SAVE NEWSLETTERS FOR FUTURE REFERENCE** .... REMEMBER .... YOUR RESPONSE NOW DETERMINES IT'S FUTURE MAILINGS

**BELOW: Mr. "Drill, Drill, Drill !" Charlie Powers** (left) and John Turnbull (right) put some muscle to the machine. Charlie is a professional miner and driller with 34 years of experience. Since Dec. '98, he's **completed over 7,000 feet of drill probes!** Charlie's been involved in 4 of the 5 diamond drill probes which have found deep fracture zones having **significant air flows** ! His calm personality & steady work-ethic deserves more than applause from all investors. John, an active investor for 14 years from Alabama, decided to join us on-site full time because, as he describes it, **"I want to HELP FIND the caverns and wiggle my toes in the river!"** That's the spirit !

**"This AIN'T NOTHING for a guy like me."**

**AIR FLOW !**

**G - 65 DRILL S**

**To understand today ,  
You have to search for yesterday.**

..... Before the ZINC MINING ENDED HIS QUEST

**West R**

**MAJOR DIAGONAL FAULT :**

AT THE BRUSHY AREA , ROCK STRUCTURES & AIR FLOW MATCH WELL WITH CONCEPTS SEEN IN EARL DORR'S ORIGINAL MAP.

**G - 68 DRILL SITE**

600 GALLON  
WATER TANKS

WOW, THIS IS  
HARD WORK !

The **RIGHT PHOTO** finds Larry Butler (L.B.) servicing a 20 KW generator while he's delivering fuel to the old Carbonate King zinc mine site. Keeping a close eye on fuel, oil and antifreeze levels, along with a lot of other **costly equipment maintenance**, keeps him very busy. With all **INVESTORS' SUPPORT**, he helps make it possible to keep machinery going which **keeps the projects going**. Driving and maintaining the 4,000 gallon water truck is another one of his priorities. **THE EXPANDED DRILLING SITES USE 10,000 GALLONS OF WATER PER WEEK !**

**THOSE TRIANGLES ..... ?**  
Ralph holds tight to his faith in a significance for those curious and inconspicuous, triangle - mapped, survey stones. **10 out of 35 stones are over 200 pounds !** A response to your questions and/or a description of their placements is available upon **request**. Please **send a self addressed, stamped, legal size envelope** or E-mail us at: **COCOWEEP@AOL.COM** Meanwhile, below the triangle, Charlie Powers keeps smiling as he racks up more diamond drill probe footage & good air-flow indications too !

# EARL DORR'S CONCEPTS ARE BELIEVABLE :

**STUDY EARL'S MAP WITH TODAY'S PHOTOS** - THE MAP WAS DRAWN BY HERMAN WALLACE, SR. IN 1940, BEFORE WWII & ZINC MINING BEGAN. EARL SAT ACROSS A TABLE, IN PERSON, GAVE VERBAL DESCRIPTIONS AND MADE COMMENTS FOR CORRECTIONS.

- Q. 1** What **PRACTICAL** goal or "target" did Earl indicate as his **DESTINATION** for the "Proposed Tunnel?" Did it stop at a likely "Tourist Cave?"
- Q. 2** Why didn't he "simply" want to dig down and through the blockages?

- Q. 3** Is HIS tunnel starting on Kokoweef's **EAST** side, going under the known 'Crystal Cave' and west under the **PEAK**?
- Q. 4** .. OR ... **BASED ON RELATIONS OF MULTIPLE FACTS**

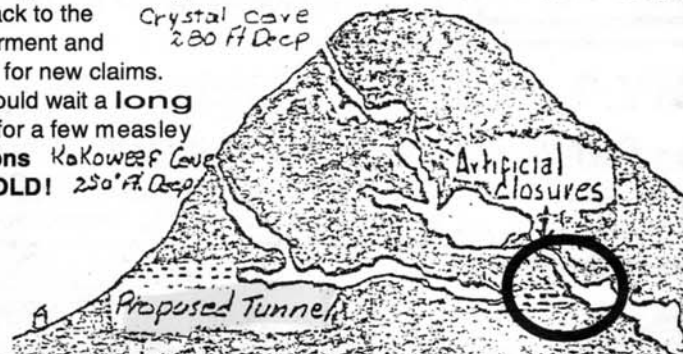

Is the tunnel shown going south, away from the 1940 camp, under an entrance (still-hidden) to a **different** Crystal Cave, under the **CREST** of the main west ridge, below the previously unknown triangle markers and ending **DEEP** below in an **open passage** on diagonal strata, **BY-PASSING** two unseen artificial closures?

**{ HINT : After years of cleaning out "Crystal Cave EAST," no artificial closures or open, unending passages were ever found! }**

## IMPORTANT NOTE

Earl's nephew, Willard, Jr., indicated that **AFTER** zinc mining was pursued ( which was after this map was drawn ), "Uncle Earl felt like ... well ... if he couldn't develop **what he told me he had found**, then **NOBODY** would!" But, **THIS MAP** was drawn at a time when Earl was still on the "track of truth." After the zinc mine started making \$\$\$, **HE WAS SHUT OUT ... IN THE COLD WITHOUT THE GOLD** ... and about out of luck. Mis-information began, the "game of whisper" took off and that's why so much mis-information abounds today. Earl Dorr was "a bit upset" by how he'd been treated by those "Los Angeles city high-binders." It wasn't important to correct what he saw as being founded on greed. Most claims back then were, eventually, let back to the government and open for new claims.

He could wait a long time for a few measly **Billions** in **GOLD!**

©1940, Crystal Cave Mining Co. ( Used By Permission )

Earl Dorr died in 1957 shortly after Kokoweef's mining claims became patented, private property. Earl learned, like a good patent attorney says: The **BEST** Patent is keeping your knowledge a well-kept **SECRET**. Our job's not one of sweet and simple answers.

With the completion of a new drill site at G -50, John Turnbull (left), Charlie Powers, Walt Lueth (behind), David Sislak and Jim Serrill are all **"GOING FOR THE GOLD."**

## WORKING OUT ON TOP OF THE WORLD

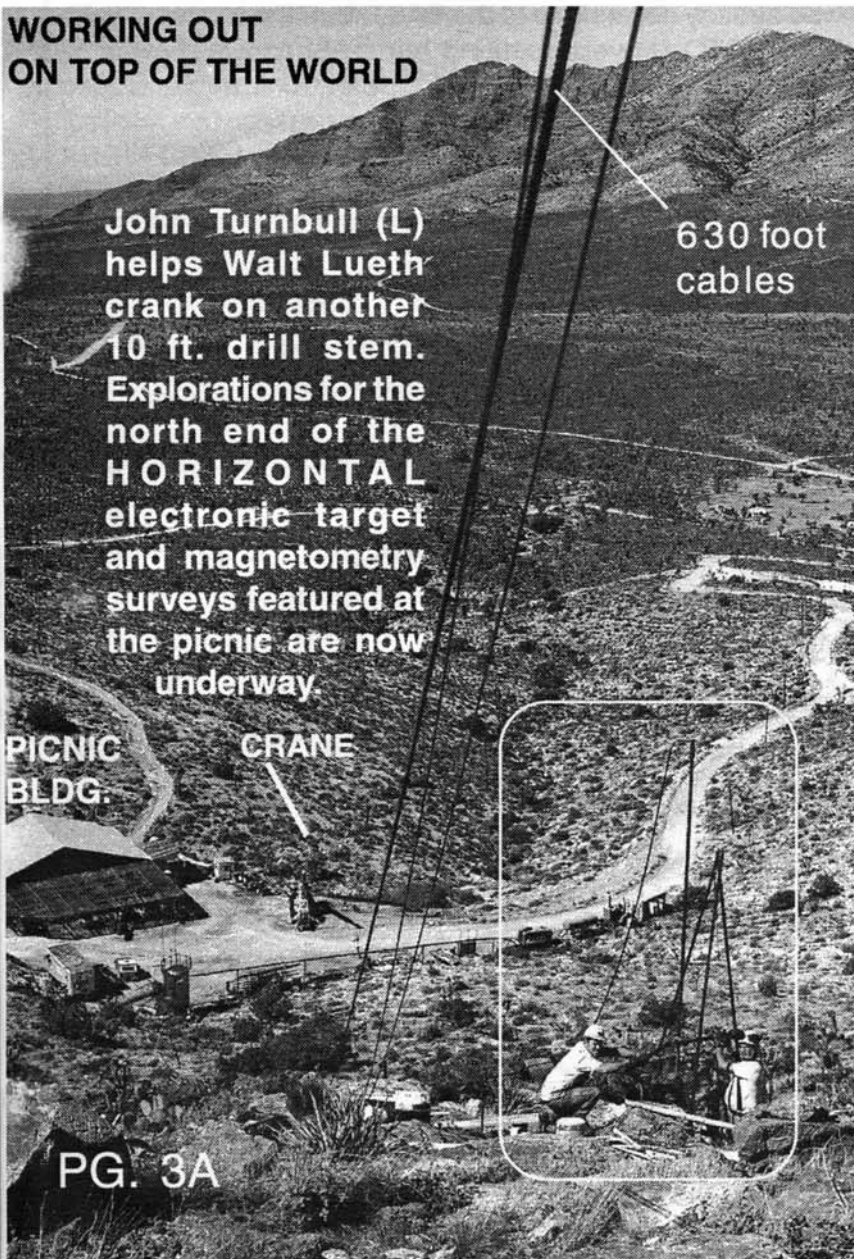

John Turnbull (L) helps Walt Lueth crank on another 10 ft. drill stem. Explorations for the north end of the **HORIZONTAL** electronic target and magnetometry surveys featured at the picnic are now underway.

630 foot cables

PICNIC BLDG.

CRANE

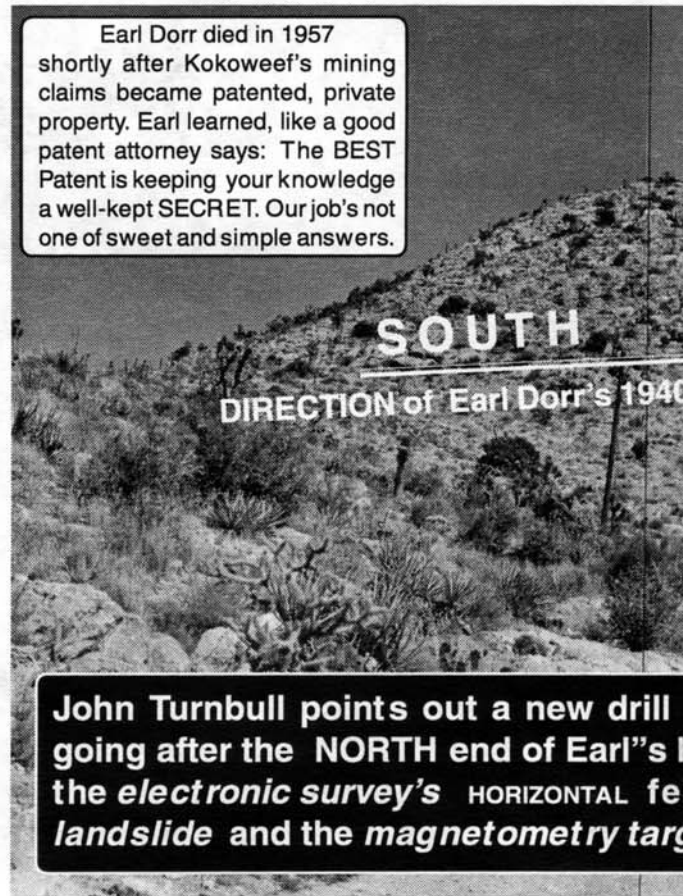

PG. 3A

**SOUTH**

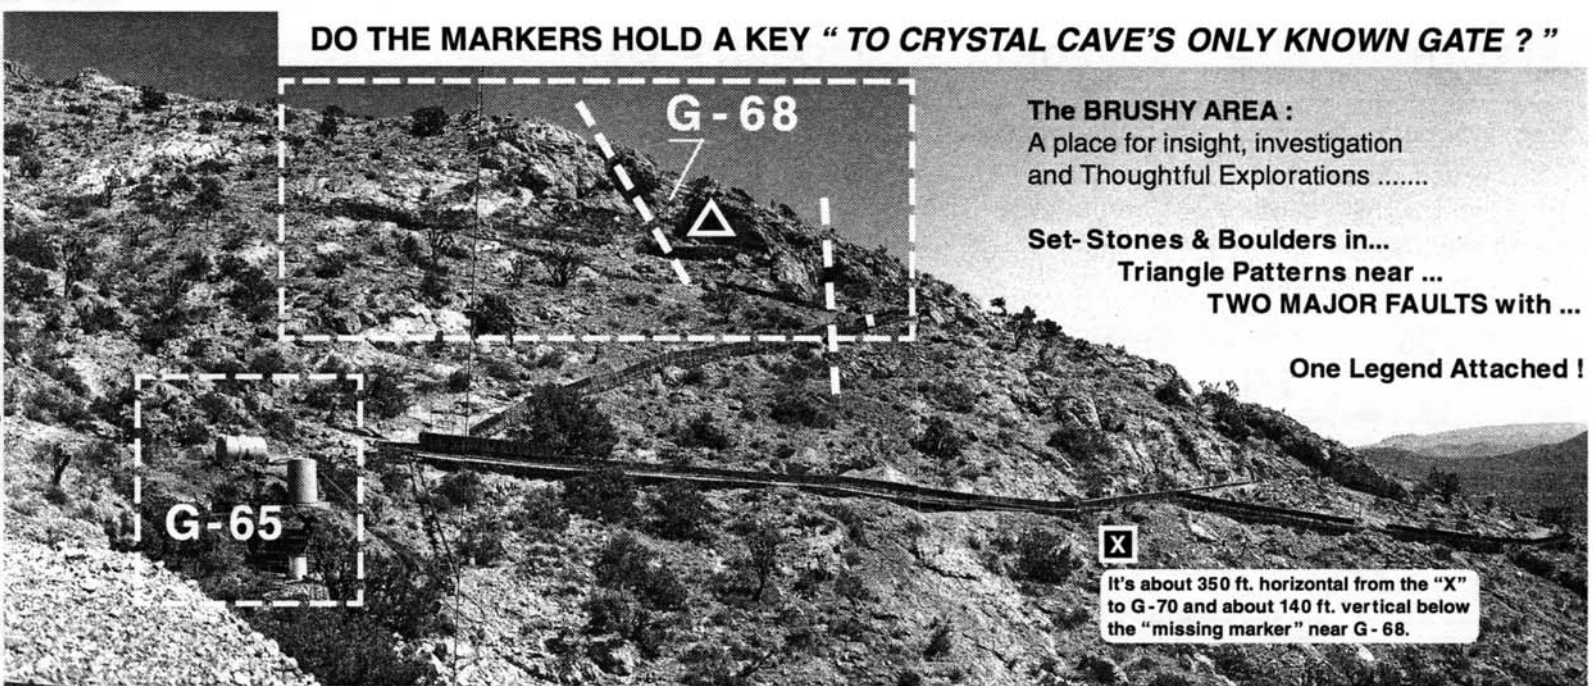

**DIRECTION of Earl Dorr's 1940**

John Turnbull points out a new drill going after the **NORTH** end of Earl's the **electronic survey's** **HORIZONTAL** landslide and the magnetometry target

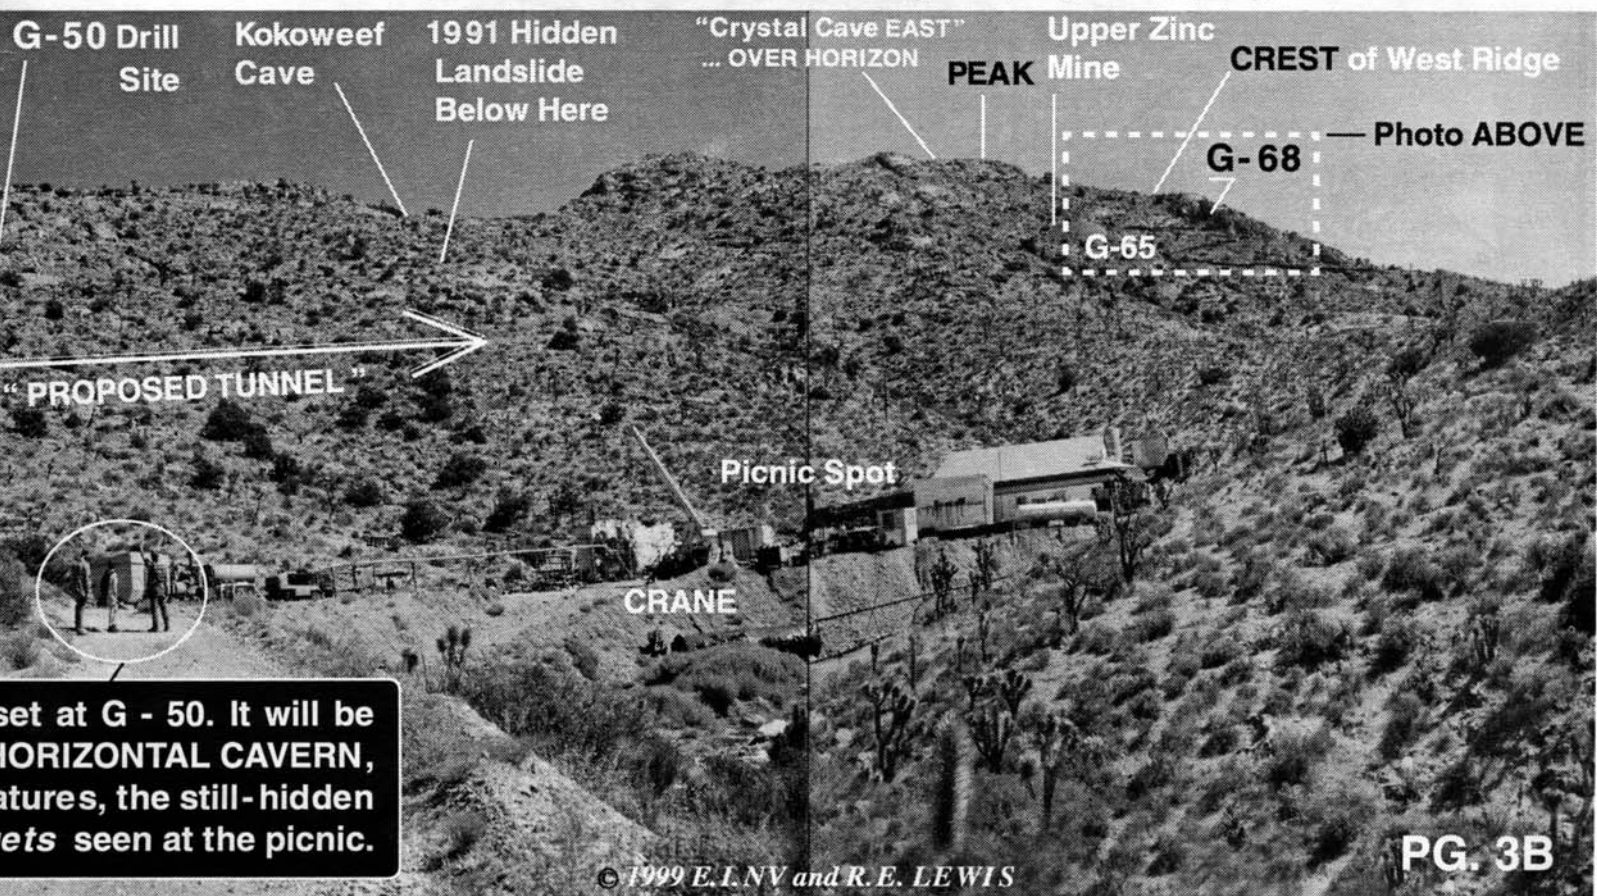

**DO THE MARKERS HOLD A KEY " TO CRYSTAL CAVE'S ONLY KNOWN GATE ? "**

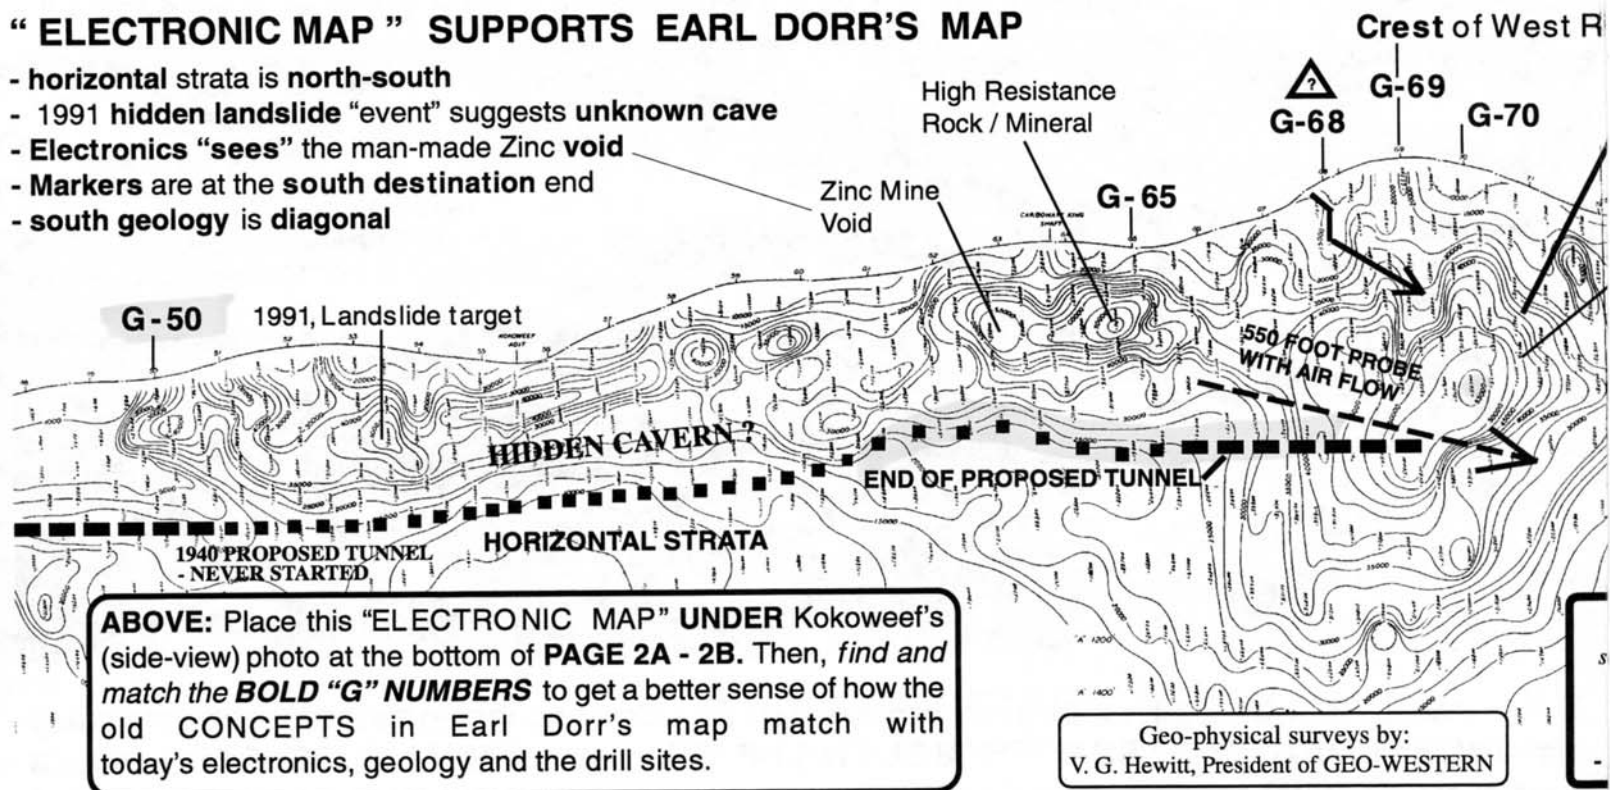

The practical, initial **DESTINATION** advanced by Earl Dorr appears to be the location providing him **UNOBSTRUCTED PASSAGES BELOW THE TWO "ARTIFICIAL CLOSURES"** under a 'crystal cave' natural opening. Earl Dorr's **METHOD** for access was a "Proposed **TUNNEL**," starting **BELOW** the **known** Kokoweef Cave, to intercept an **unknown horizontal cavern**. The map's left symbol  represents the basecamp where the drawing was made. Therefore, the horizontal cavern goes **AWAY from camp** - in a southerly direction. This horizontal cavern was to be **extended farther south** by another tunnel to link with a separate, **DIAGONAL** passage leading to the final **OBJECTIVE** in 'his' underground canyon ... gold! gold! gold! (per Earl's 1934 affidavit). Hopefully, the **REAL** Crystal Cave may still be hidden just **north and below** the **CREST** of Kokoweef's main **WESTERLY** ridgeline. Drilling is starting now ! **ONLY WITH EXPANDED INVESTORS' SUPPORT**, can ALL our **inter-related** projects progress rapidly this winter!

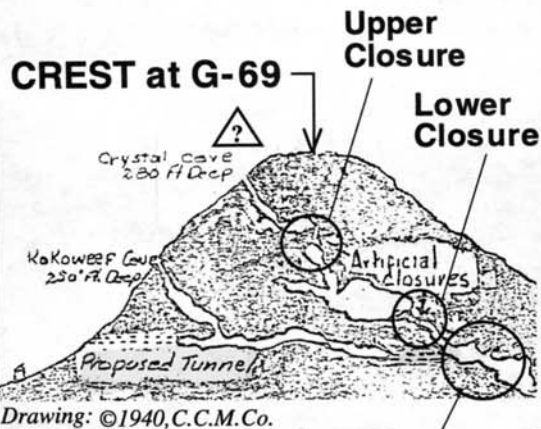

## "ELECTRONIC MAP" SUPPORTS EARL DORR'S MAP

- horizontal strata is north-south
- 1991 hidden landslide "event" suggests unknown cave
- Electronics "sees" the man-made Zinc void
- Markers are at the south destination end
- south geology is diagonal

**WHAT'S GOING ON UP AT THE BRUSHY AREA ? .... and W**  
**READ & STUDY** the ENTIRE NEWSLETTER ! *"Take care, then ... Decide for you*

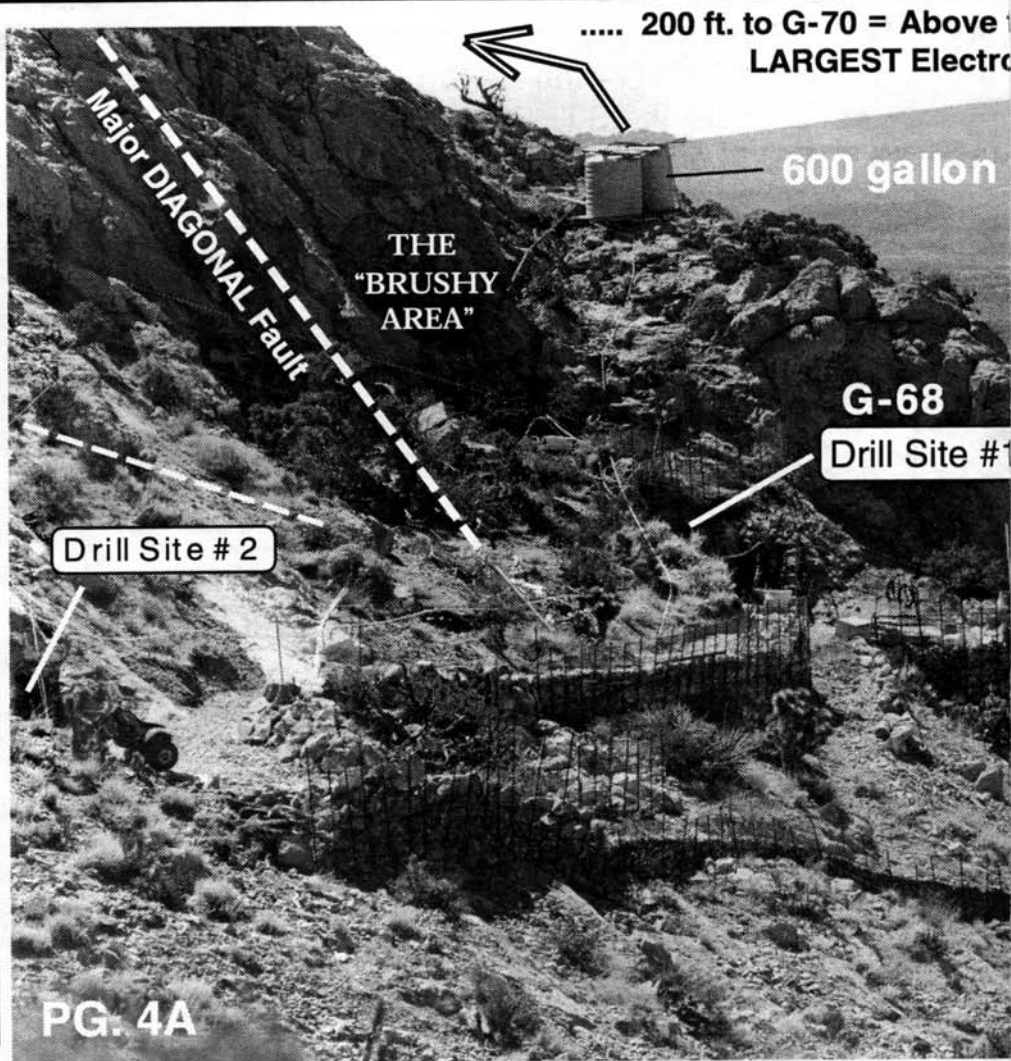

### EARL DORR'S PLAN:

### Tunnel BELOW the Closures !

The Brushy Area involves Drill Site G-68 and the stones set in triangular patterns. We will **safely identify** any passage and closures by drilling **FIRST** without any SLOW digging.

If found, and blocked, more drilling and probe-camera work can determine how deep to go and then **TUNNEL BELOW** any closures. Being a **practical miner**, Earl Dorr had **PROPOSED** this. He knew it was **safer, faster and less expensive !**

idge

water tanks

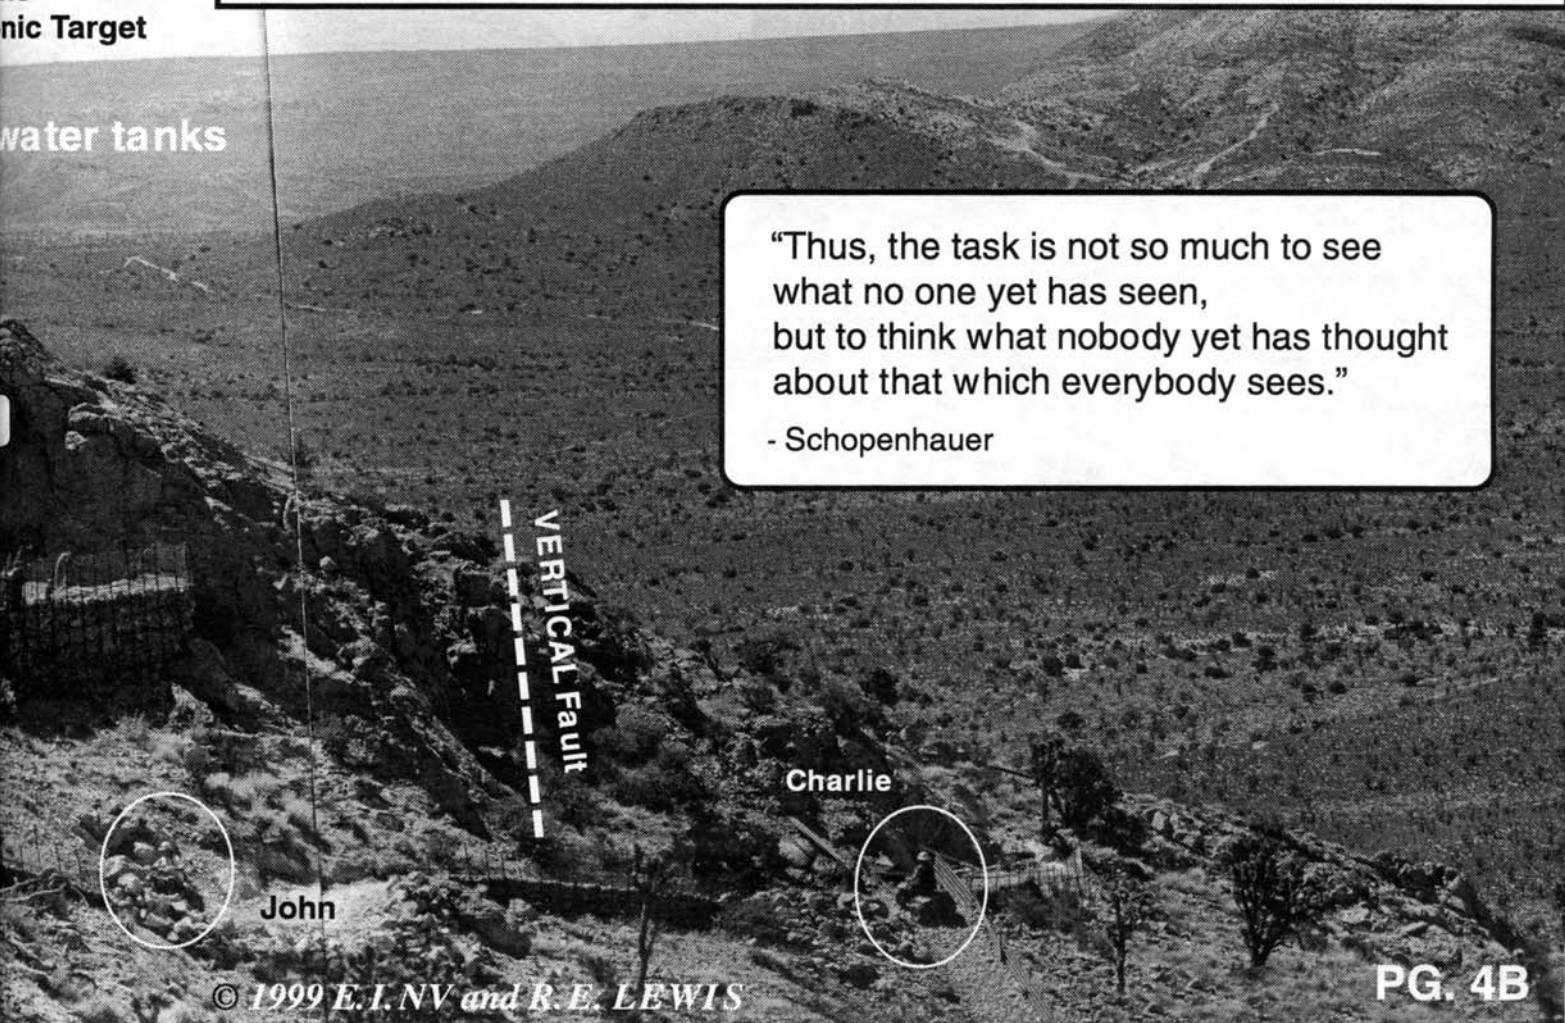

### ABOVE: The CREST is NOT the PEAK !

Folks assume the top of the "hump" on Earl's old map is Kokoweef's PEAK - especially since a convenient OPEN hole - A 'crystal cave' was already downslope to the EAST. But "the hump" may be SOMEWHERE ELSE on Kokoweef Mt. - The PHOTO above sure has a hump! Shadows show geology of TWO MAJOR FAULTS INTERSECTING at G-70 where our LARGEST electronic target is seen in the left map. Perhaps the triangle patterns relate to a HIDDEN entrance and a passage to a "crystal" cave under the "hump", or ridgeCREST, at G-68,69 & 70! The geology nearby, plus the HARD WORK to move the stones into measured patterns, suggest they may be related somehow to **A PURPOSE !!!**

"Thus, the task is not so much to see  
what no one yet has seen,  
but to think what nobody yet has thought  
about that which everybody sees."

- Schopenhauer

## CRESTLINE OF KOKOWEEF'S WEST RIDGE

Two "triangle markers".  
The top one is **elevated**  
by 3 stones put under it.  
Each boulder is several  
hundred pounds !

Drill Site G-68  
"The Brushy Area"

**GEOLOGY + MARKERS = CURIOSITY !**

**IN THE BEGINNING ...** at any entrance ... there first has to be **GEOLOGICAL STRUCTURE** for the cracks, passages and caves to form along. The visible, **major fault structures** in and around the "Brushy Area" are not a guarantee for passages, but certainly show compelling evidence for a hidden possibility. Two are shown by dashed lines - plus how they may relate, in the lower drawing, to a description for "Crystal Cave's passages."

## CRYSTAL CAVE : "EAST vs. WEST"

The OLD, familiar Crystal Cave, on Kowweef Peak's **EAST** side, has several facts that don't match Al Masters' writing of "**DORR's Crystal Cave**" = ( circles 1-16 ) from True Treasure July, '70

A - The entrance is a rounded **hole**.

B - A rope is necessary starting at the surface since it **begins vertical**.

C - "Dorr" is smoked **twice** and only in the **second level down**.

D - Going down to the 2<sup>nd</sup> level is **VERTICAL** and needs a rope again.

E - "pools" of **cry-**  
**stals** have never been  
found in a side passage.

F - It has no small, natural tunnel with air flow & ....

G... - It isn't even close to 280 ft. deep.

**EAST**  
is a...Crystal Cave  
250' Ft. Deep

VIEW LOOKING SOUTH FROM ON TOP OF THE OLD ZINC MINE

A two-foot wide void with air flow has been drilled into by Charlie Powers. Just 60 feet in from the arrow at Drill Site G-65, the strata runs N-S, from the direction of Earl Dorr's old "Proposed Tunnel" (behind the photographer), and up (south) to the dotted line central to the marker-rock area. If a hidden passage is **that close** to blasting in the old zinc mine it probably would have been damaged. With a passage potential closer to the zinc mine than ever suspected before, it may account for Earl Dorr being upset about the blasting!

© 1999 E.I. NV and R. E. LEWIS = cocoweep@aol.com

NOTE: It's written that Earl Dorr was originally given a map by two men who **PRECEDDED** his RE-discovery of the much earlier cavern discovery. Considering the complex, precise, inconspicuous nature of the "markers", and the shear physical effort needed to set 10 of the boulders, it's reasonable to assume they were mapped. But we don't know by who, when, why or what they indicate. ... more RE-search is needed !!!

recording controls

## The second ..... **SPECIAL REQUEST**

With over 11,000 feet of probe holes drilled, we are WAY BEHIND in fully documenting the interior views of probes for clear & complete information. Once, when we drilled down to the Carbonate King tunnels, we went through 3 feet of a tunnel and didn't even know it *UNTIL WE SAW IT* with our own eyes the next day !

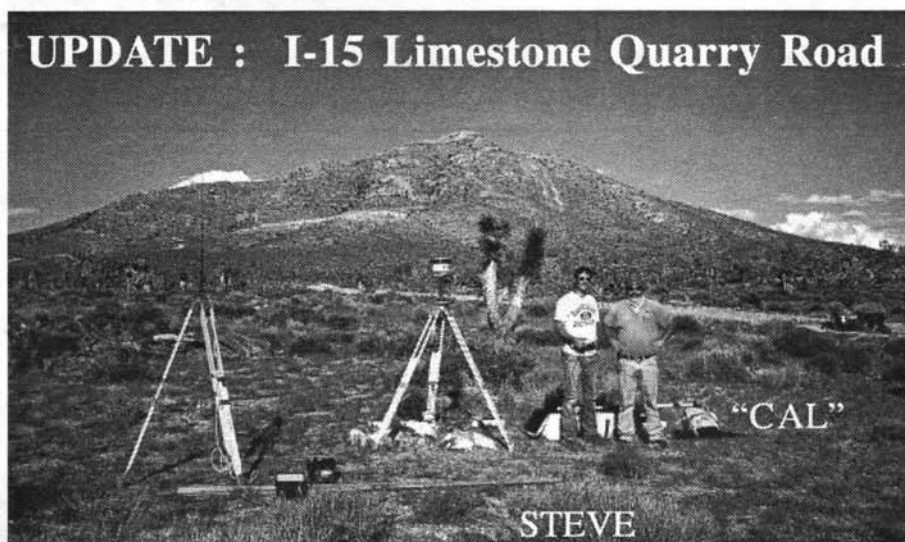

At left, Norman Gaines, an investor with electrical engineering degrees, has located a superb, fully engineered system for remote, visual & audio recording in pipes, drill probes, sewers, collapsed buildings, etc. **Everyone** who has seen it's one-man operation demonstrated has been absolutely astounded. The left photo shows the monitor's image of a quarter inside a probe-sized tube, but it does **not** do the **CRYSTAL - CLEAR** lens justice! Please do our quest justice and **help** purcha\$e this "sapphire lens" technology to help us see the Crystal Cave passage sooner. At a **base price of \$5,000.00**, we're hoping you'll be extra-generous to help buy this special and **necessary tool**.

It's ironic if, like in the zinc mine tunnel, we already drilled past Dorr's air-flowing passage but can't **see** it yet! And if triangle marker-rock theories are correct, we'll use the camera in future probes. We hope to see the name "**DORR**" smoked on a wall of history's **REAL** Crystal Cave and **OUR DORRway** to the River-of-Gold!

**AL WHEELER** gets a special "*Thank You!*"  
 He's been grading our dirt road, delivering fuel  
 and helping us find essential equipment and  
 materials for years even with his busy schedules!

## UPDATE : I-15 Limestone Quarry Road

**SURVEYORS** from the company developing the limestone quarry have finished the road surveys. 75% of the permitting process is complete and their best route is labeled on the front page. Next, archeologists will inspect it and, if approved, the **dirt road** construction is expected to begin **next summer**. We're not receiving production money yet, so ....  
**We're still DEPENDING on YOU for operating funds!**
