

The Truth of Love Cannot Be Broken
The Love of Truth Cannot Be Broken

by Ralph Lewis, BSA

The only thing new in this world
is the history you **don't** know.

– Harry S. Truman –

It was “business as usual” to recently learn, from a reliable professional, that there is apparently a **NEAR-SURFACE** mineral vein, running about 3,000 feet long, SW from Kokoweef Peak (depth unknown). Originally, seeking that sort of possibility was THE motive that inspired me to take the initiative to survey & flag out the two miles of end-lines for 20 new claims, which I’d located and filed for ya’ll on the south & southwest flanks of Kokoweef Peak. After the electronic surveys were completed, somehow, that information “never made it to the surface.” Apparently, an unexpected, breathing crack took us down the rabbit hole to Kokoweef’s “incompleted

fantasies” instead. Same ‘ol story? Now, several YEARS later, the shallow mineral possibility has not been communicated widely, pursued nor core-drilled for ACCURATE sampling. Why?, I wonder. It’s potential certainly wasn’t mentioned much over the last several years nor mentioned at the 2010 Kokoweef, Inc. Annual Meeting. Am I wrong or just deemed “not worthy of knowing” by some inner-circular reasoners?” This year, it **was** announced that coring for the **DEEP** mineral sulfides would cost “\$250,000 per drill hole” and that “\$5 million dollars” could not be raised to get it done. (Excuses?! Hey, what about that **shallow** vein ‘o minerals!?) So, I’m wondering if ignoring shallow mineral potential\$, in favor of what’s “exciting” & ‘obvious’ (air flow/cave off the private property), suggests real minerals may never be pursued by Mr. Management. If so, it’s probably due to the “**brainlock**” of pursuing a legend that’s quite doubtful with respect to historical content, true contexts of information, nor the likelihood of any “only known entrance” ever being AT Kokoweef Peak. Chasing that “missed-her fairytale” (for 76 years) has been like trying to fit Cinderella’s lovely Crystal Slipper only on her ugly sisters’ feet!

Thank you NOT Earl Dorr ! Mr. Dorr lied about going through Kokoweef Peak’s Crystal Cave to our “stream of dreams.” He spun his own supposed advantages, during the Great Depression, and for his own purposes. - - no one else’s! And he wasn’t above lying or (reportedly) blasting two men in alive to set things up the “best way” (?) for himself!

Hilariously, history has gone full-circle again. We're in the midst of another world-wide financial crisis and desperate diggers are back digging where digging **began** in 1935 --- in "Who-knows? Cave" (*Quién Sabe Cave*) When that digging stopped in 1936 it was only a REAL MINERAL quest that brought things roaring back to life. Then it was Carbonate ZINC: **TANGIBLE, rational, well-managed MINERAL pursuits\$ were the only \$alvation** back then at the 'church-of-kokoweef.' And, with success on their horizons, no one needed to figure out that Earl Dorr was a "fiction fabricator." I can imagine a conversation of the day: "Ya know, Dorr *lied* to us." "So, Who cares? We're makin' money now!"

But, OUR THOUGHTS lie too ! - - and, without cultivating a means of discernment, they lie to us ... a lot!

I learned this from both Dr. Daniel Amen of the AMEN BRAIN CLINICS and his very insightful, sweet friend; a lady named **Byron Katie**. YES! It's especially easy to lie to our self when the beliefs and feelings we choose to "buy into" with imagination (non-reality) are fit into a personal SENSE of "a thought-reality" that requires **maintaining the untrue 'thought-reality.'** Like it or not, MATERIAL REALITY is what it IS - - not what's "*believed with all our believing.*" And HOW our "mind's eye" views something **with its CHOSEN THOUGHTS**, determines **how individuals feel and react** to presentations of information directed to and by their brain-body mind. Or, turned around, we can do this, in part, when **not** presented with critical pieces of info. Like: "Okay, Earl! Where's the

REAL entrance? You know, the one with ‘Shorty-‘n-Slims’ bones in it?” So, a “favorite place” is **invented** instead.

Presentations of information may feel harmonious (agreeable) or in contradiction (disagreeable) to anyone’s “favorite view.” Often these are based on mental INTERPRETATIONS of the UNseen or UNverified or Unknown versions for what is **believed** about a subject - - like seeing photos or movies or reading an Affidavit for instance. Humans are prone to attach ‘absolute’ meaning to things based on limited or controlled information. (Sometimes, **Intentional** Propaganda) Reality, however, IS what it IS and it can be KNOWN..... but, it can also be psychologically DENIED. DENIAL happens most easily due to traumas (don’t want to see or know) or “when EGOs reign” because Ego does not like to be proved wrong.

CASE IN POINT:

At the Kokoweef, Inc. annual meeting, I was allowed to begin making some comments which was fine at first. After a mike was offered to me, I started to say that 2 pictures “reportedly” being “of Kokoweef Cavern” have been proved to be NOT so. However, when I began indicating these errors related to the 4 photos’ being prominently displayed up front (which were ALSO identical to ones on the “Official Kokoweef Website”) ... That’s when the “Microphone ‘CIA’,” (Cover Inc.’s Arse) moved in and rudely confiscated the truth-telling microphone from investor-researcher-me. (Why? ... to ‘protect’ the audience? ... Oh, of course... from the truth’s ‘psychological damage’ to the INVESTORS ! ;) Well, I only got to specifically mention that photo #3 (below) had been identified, in REALITY, as being “of Cottonwood

Cave” in New Mexico. (i.e. NOT in any sense available for being ”**of** Kokoweef ”) Yep, revealing some Truth was my “Kokoweef Krime” leading to a hasty “conviction-without-jury.” I think an excuse was given something like “They (their sheeple?) ...didn’t really want to know...” What blatant B.S.! No one in the audience was openly complaining. No boos or hisses. In fact, several open-minded souls later expressed to me afterward that the “give-and-take-away” microphone-policeman was definitely a rude-dude. But, what can you expect from ‘all-knowing’ legal-squeagles. At least it wasn’t a sea gull dropping its load on me from “up on high.” At any rate, I guess the whole incident wasn’t too embarrassing for the Directors because those 4 photos are *still* flying high - - inspiring more “**B**elievers’ **S**alvation.” ... but, that’s just a guess.

Photo # 3 ...

The Entrance to “Cottonwood Cave” in New Mexico

This photo was identified by a cave expert, the Executive Director of the American Cave Conservation Association. He wrote: " (Photo: #3) is very clearly Cottonwood Cave in the Guadalupe Mountains of New Mexico."

Something I hadn't been able to share with the audience of long-time friends and new investors is found below. First, I would have asked:

Is This Picture **TRULY** "*of Kokoweef Cavern*"?

Does ANY held-Thought **MAKE** it be "*of Kokoweef*" ?

- If "No," How would you feel with a correct thought ?

- If "Yes," then how does your BELIEF make you feel when it's contradicted by the truth?

How would you feel without the untrue thought "This is 'of Kokoweef'?"

There is **no shame in Truth** - - only release to freedom.

Picture #4

This Black & White photo was headlined as being (reportedly) "*of Kokoweef Cavern*" ; at www.kokoweefinc.com/mine.html .

As presented there, it also gushes with the pronouncement it is:

**“ The final
picture of the
cavern. Notice
the depth and
how vast the
cavern is in
this view...
Spectacular! ”**

However, noticing just one visual-perceptual geological detail reveals this cave photo is **definitely** being displayed **Upside Down**. You see, in the REAL world, vertical flowstone ribs FORM only by *gravity-controlled* water flowing **OVER** and DOWN the **OUTSIDE** of horizontal, scalloped or rim features - - **NEVER down FROM underneath and then TO a lower rim.** It ‘appears’ to be doing that on the left side in the B&W photo above! So, logically, this “depiction” cannot be hanging down into anything & especially not into any “kokoweef canyon.” But, an even easier proof is found on the next page.

The TRUE LOCATION and ONLY correct orientation possible for B&W photo #4 becomes INCREDIBLY OBVIOUS when comparing it to a color photo of the SAME stalagmites IN CARLSBAD CAVERN. Oobs!

NOTE: For easy comparisons REDUCE THE ENLARGEMENT % in order to see both the B&W and color photo within the same screen area when you *scroll down*.

PHOTO Source:

http://en.wikipedia.org/wiki/File:Giant_Stalagmites_in_Carlsbad_Big_Room.jpg

Yes, these Giant Stalagmites are **IN** Carlsbad Cavern... STILL

... stalagmites grow mighty from the **g**round UP.

... stalactites grow and hold tight from the **c**eiling DOWN

As presented here, right-way up in their true, natural orientation, you have the opportunity to ACCURATELY compare photo #4 to

the color photo above. Then the **DETAILS** seen in BOTH photos EASILY reveal the truth, which has ALWAYS been:

“**Picture #4**” was presented **upside down**, it has **no “depth”** and, in truth, is **NOT** and cannot ever be “of Kokoweef Cavern.”

This is a 100% certainty... unless someone is delu\$ional. And, like it or not, there’s NO certainty in believing delusions.

The lesson is: EVEN IF YOU ARE **NOT** ALLOWED nor ENCOURAGED to, **Investigate the details of information !** BECAUSE ...

For better and WOR\$T, Egos profess-and-‘protect’ what they LIKE themselves & others to believe, see, think or feel **without regard for** **FIRST** determining **what the Truth really is**.

Plainly, a **truth** is shared here that **any normal person can understand**. (Is that even legal today?)

As they say. “The devil is in the details.”... But, I didn’t put ‘em there. (I only find & point ‘em out.) Nor am I responsible for how others choose to react to revealed truths that are contradicting assumptions.

Yesiree, the gushing “**DEPTH**” which is miss-presented as an enticing, yet **disorienting** image, is REALLY an “Upside Down **HEIGHT**.” This mirrors 76-years of “legend-hunting @ Kokoweef.”

Unfortunately, this is only ONE of many typical, historically miss-presented ‘factual impressions’ that have been debunked about the so-called “Kokoweefy” Legend. What makes it seem so sad for this Truthseeker (a **former, unquestioning** “treasure-moron”)

is that, by correcting & presenting many other contradicting and disproved details about the so-called “legend evidences” {Wishful Thinking) of Kokoweef Peak, the “reward” has been to be reviled, shunned, rejected & falsely labeled as being:

... a “destroyer of dreams”

... a “co-conspirator”

... an “environmentalist”

... someone to “best ignore”

... someone to keep away from a microphone at annual meetings

... “too negative”

In truth

I’m much more friendly & **positive** than such IMPOSED, **negative** labels make me out to be.

I still recall the YEARS I FELT like a “favored sun” @

Kokoweef. Now, some folks are screamin’ **SUNBURN!**

Mostly this is from (negative?) people using ‘easier,’ less mentally demanding methods of plainly “dismissing-and-ignoring.” Others prefer to promote an “Ad Hominem” logical fallacy to deflect attention away from the not-truths about Earl Dorr’s ‘legend.’ However, it’s always kinder and more productive to **first determine the truth** of a matter and, then, learn to appreciate and accept the true findings as simply being efficiently helpful and beneficially useful. However, susceptible brains believe the short-cut lie that it’s ‘easier’ to shoot-the-messenger than to listen, consider or even accept disturbing, REAL historical Truths.

..... Must.....NOT..... Change..... Any..... Thing....

Oh well, so much for the ideals of sharing results of open, honest, comparative investigations.

- - - - -

The **OPPOSITE** of grounding oneself in finding the correct context for facts **is** known as “**BULL SHIT**” - - or, more commonly, “**B.S.**”

This waste-deep subject also happens to be a delightfully short and respectful topic of revelation by Princeton University's Professor Emeritus **Harry G. Frankfurt**. His 67-page book-ling is aptly titled "**On Bullshit**," It **is** a great little read and it immediately grabs one's attention by honestly opening with the humorous, obvious statement: "**One of the salient features of our culture is that there is so much bullshit.**" He goes on to say, near the end of his illuminations: "**Bullshit is unavoidable whenever circumstances require someone to talk without knowing what he is talking about.**" I suppose that's why the Latin phrase "Caveat Emptor" was invented; meaning "**the buyer alone is responsible for checking the quality and suitability of goods before a purchase is made.**" Or, less exact, but more memorable; "**The BUYER beware!**"

Maybe those "Latin guys" knew about Earl Dorr!

We are often pressed to "**purchase**," or "**buy into**," the intangibles of **UNEXAMINED "B.S."** STATEMENTS, IMAGES, THOUGHTS, BELIEFS or FEELINGS are all **INFORMATION** originating from either within our Self, **OR** from others. Some call it "Marketing" or "Advertising" or "Record Keeping." (Bernie Madoff comes to mind.) But, regardless of the seller, the "purchase" is 'sold' whenever a person enables **anyone**, including their Self, to be taken advantage of by any 'appearance of authority' while **ALSO NOT insisting on Verifying before accepting something as "the Truth,"** This lack of principle often devolves into skillful, manipulating, '**sincere**' **B u l l S h i t !**

And, yes, even individuals accept and sell a lot of ROT to a part of themselves.

Anyway, reading the book "**On Bullshit**" is recommended for ALL treasure-morons seeking to evolve away from any borrowed, rigid, dogmatic, ego-driven self-deceptions - - especially those being presented by other self-serving "sales people."

Again, " Earl Dorr " comes to mind ! But, there are more like him.

CRIMINY ! Are we only left with the **ENDURING ' PROMISE '** of eternal, lumps and bumps of **B.S. ?**” ... Everywhere!? ... in the news, conversations, religions, movies, treasure hunts, magazines, war-drums, newsletters, hot-stock headlines and the like? Happily, I can say there **is** SOMETHING MUCH BETTER in life than discovering **B.S. mixed with Earl Dorr’s ‘gold’**. It’s in your heart already... when you look for it.

And it can work to help Plaintiffs and Defendants alike! :)

Byron Katie reveals this in her incredibly insightful book: “ **Loving What Is**.”

For those inclined to “not be positive” and any who PREFER to pursue the desires to **NOT AVOID** “**the burdens of believing B.S.**,” I heartily suggest that BOTH books mentioned above be avoided like the plague! That way similarly minded people can continue living with a motto appropriate for every failed endeavor blissfully following Earl Dorr’s LACK of footsteps through Kokoweef Peak. The unquestioned mantra-motto that fits so well with ALL miss-presentations of a legend ‘at’ Kokoweef Peak” is:

“ Send money...It WILL Be Spent...Forever ! ”

Never the less, we each CHOOSE to walk, run or fall down wherever and however we wish to move with our THOUGHTS. Are your Kokoweef-thoughts **really** True?

.....

So, there you have it. You’ve been given a free ‘n easy lesson on miss-presentation & misperception

along with some basic clues for “How to NOT Build Primrose Paths... to nonsense.”

It is peculiar how the SEEKING & SHARING of **old truths** is devalued and discouraged these days. But I no longer consider revealed B.S. to be spiritually inspiring, physically motivating or financially wise for courses of action. Nor is it something worthwhile to tie up the mind's well being into knots of anger. Truth is what it is. Find it and SHARE the Freedom !

Please consider This: “Is it *really* easier to “exclude history and ignore the corrected context of facts?”... and be more likely to ‘enjoy’ future mistakes, more lost time and lost money based on using false premises to guide action\$?

Well, “After seeing the obvious, **impossible reality** for Photo #4 EVER being “**of** Kokoweef Cavern,” I’d love to know **WHY** would any person “maintain,” or even imply, that the **DOWN-SIDE UP** photo #4 **qualifies in any way** to “depict Earl Dorr's account of the canyon”?... AND keep on presenting it that way?

Apparently, even though we **KNOWN** better, the entertaining of half-truths, excuses, self-imposed delusions and unexamined assumptions seem to be a ‘real’ non-reality for some - - even though it simply “is... NOT.” And it’s not “good reasoning” for helping to truly **SOLVE** a legend nor for “ERASING it’s

illusions.” But, in the end, such miss-takes are all things that we ARE capable of learning to understand ... and, also, to BE FORGIVING OF.

With that said, I shall close. Duty calls me elsewhere for healing. Still, I encourage ANYONE to re-search and do TheWork.com to help add insights toward any other “authentic-looking” photos, maps, movies, motives and minerals. I’d love to **KNOW** whether they are the “Real Deal” OR, perhaps, just more, 10%-pure “gold-in-black-sand B.S.” - - Historically ignited by Earl Dorr in 1934 and STILL being re-presented to blow up in new faces decades later; as emotionally based promotion\$, originated in appealing, unproved premises by ONE Affidavit and followed by heavily edited ‘evidences’ which, likely, leads toward more continuing self-deceptions about “Kokoweef Peak’s popular & reality-elusive underground river-of-gold” **MYTH**.
